I have worked with international clients based in USA, UK, Canada, Netherlands, Australia, Italy, Ireland, France etc. I have worked on many different projects - ranging from small software to complex web applications.

I have a training Institute in **Kolkata, West Bengal** with the name "WPS Training Institute"in **Kolkata, West Bengal**. I have already given training of 5000 Students till now, and all my student working in MNC and Software web Development Company.

How we are starting: Because we are doing live Project training so we are taking 5 pages html and css basic shopping cart website and doing custom theme developer and working on that website with all these topics .

Objective

Magento Development Training is designed to teach how to work with theme and exiting extensions for Magento and manage the whole site with Admin efficiently. Participants will be able to implement simple business logic and work with the database and will also be introduced to the Magento API and important system resources and services. This training is for advanced users and site administrators of Magento with at least some knowledge of the PHP language.

Prerequisite

- Prior exposure to PHP development is must.
- Reasonably good database skills.
- Html and css

Hardware & Software requirement

- System configuration - Intel P4 / Core 2 / Dual Core processor with 2 GB RAM
- Operating system - Microsoft Windows XP with Admin access

Who should attend?

- Business owners or employees responsible for their company's Magento website and want to learn Magento best practices.
- Web designers looking to expand their service offerings by providing Magento Commerce sites for clients.
- Web Professionals looking to save time by learning from Magento experts.
